IDENTITY:  Trade Name: OCTOCAL, OCTOCANAL  
Code: O-PSY, O-PSYK, O-PTC, O-PTCK

Chemical Description: Calcium hydroxide preparation  
Product Use: Dental material

SECTION I  
Pulpdent Corporation  
Phone Numbers:  
80 Oakland Street  
24 Hour Emergency: (800) 535-5053  
Watertown, MA 02472 USA  
Customer Service: (800) 343-4342 / 617-926-6666

Date Prepared: January 1, 2013

SECTION II - HAZARDOUS INGREDIENTS

<table>
<thead>
<tr>

DOT HAZARD CLASSIFICATION: Not regulated  
WHMIS CLASSIFICATION: E - Corrosive material  
NFPA HMIS RATING: HEALTH: 1  
FLAMMABILITY: 0  
REACTIVITY: 1

SECTION III - PHYSICAL / CHEMICAL CHARACTERISTICS

Solubility in water: Negligible  
Odor Threshold: Not available  
Appearance: White liquid, paste or powder  
Odor: Odorless

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point: Not available  
Flammable limits: Not available  
Extinguishing Media: Use any means suitable for extinguishing surrounding fire.  
Special Fire Fighting Procedures: Wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.  
Hazardous combustion products: Caustic fumes of calcium oxide form when heated to decomposition.  
Unusual Fire and Explosion Hazards: None

SECTION V - REACTIVITY DATA

Stability: Stable under normal conditions.  
Conditions to avoid: Temperature greater than 80°F/ 27°C.  
Incompatibility: Reacts violently with maleic anhydride, nitroethane, nitromethane, nitroparaffins, nitropropane and phosphorus. As a strong alkali, it is incompatible with acids.  
Hazardous Decomposition Products: Caustic fumes of calcium oxide when heated to decomposition.  
Hazardous Polymerization: Will not occur.  
Conditions to avoid: Not applicable

SECTION VI - HEALTH HAZARD DATA

Summary of Acute Hazards: Minimal health hazard in the quantity of liquid and paste contained in these products and under normal conditions of use. However, in large amounts and/or with prolonged exposure, calcium hydroxide is corrosive and may cause irritation and burns to mucous membranes, eyes, gastrointestinal tract, respiratory tract and skin. Calcium hydroxide in its powdered form presents an inhalation hazard.
Route of Exposure | Signs and Symptoms
--- | ---
Inhalation | Calcium hydroxide powder may cause irritation of mucous membranes and upper respiratory tract. Paste and liquid preparations cause no symptoms.
Eye Contact | Corrosive. May produce irritation, pain, ulceration of the cornea.
Skin Absorption | Not applicable
Skin Contact | Corrosive. May cause irritation, burns or blistering, depending on duration of contact.
Ingestion | Gastric irritant. May cause pain, vomiting, diarrhea, and collapse.

Summary of Chronic Hazards: Narrowing of the esophagus may occur weeks to years after ingestion.
Carcinogenicity | Not considered a carcinogen.
Reproductive Toxicity, Mutagenicity, Teratogenicity: None known.
Special Health Effects | Persons with pre-existing skin conditions may be more susceptible to irritation.

Emergency First Aid Procedures

| Route of Exposure | Procedure |
--- | --- |
Inhalation | Move to fresh air. Seek medical attention if breathing is labored.
Eye Contact | Wash with running water for 15+ minutes. Seek immediate medical care.
Ingestion | If swallowed, DO NOT INDUCE VOMITING. If person is conscious, give large quantities of water/milk. Call for medical care immediately.
Skin Contact | Remove contaminated clothing. Wipe off excess and wash skin with plenty of tepid water. Seek medical attention if irritation persists.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING & USE

Handling and Storage Precautions: Keep tightly closed in original container; store in a cool, dry, ventilated area. Avoid temperature extremes (>80°F/27°C, <40°F/5°C). Protect against physical damage. Isolate from incompatible substances. Paste products: remove applicator tip, add a drop of water to cap and recap syringe immediately after use. Do not leave applicator tip on syringe.
Release or Spill: Wear gloves, safety goggles. Powder spills: wear dust mask; pick up spilled material without dispersing powder into air. Paste and liquid spills: wipe up with paper towels. Wash area of spill with water-saturated paper towels/cloths. Place material and towels in container for disposal.
Other Precautions: Wash hands after use. Spills may result in slippery surfaces.

SECTION VIII - CONTROL MEASURES

Respiratory Protection: Not necessary under normal conditions of dental practice. If handling large quantities of calcium hydroxide powder, where the TLV may be exceeded, an OSHA-approved dust/mist respirator is recommended.
Ventilation: No special ventilation necessary if level of calcium hydroxide powder is below the TLV.
Other Protective Clothing or Equipment: Emergency eye wash fountain should be close by and maintained. Wear lab coat, long sleeves and apron to prevent skin contact.
Work/Hygienic Practices: Wash hands after use; wash contaminated safety equipment before re-use. Persons regularly using large quantities of the powder form should not wear contact lenses.
